NEW AND RARE MOTHS IN EASTBOURNE. — Upon the evening of the 19th October, 1977 I took an example of *Heliocoverpa armigera* Hbn. (Scarce Bordered-straw), possibly a migrant and a species that has never before been recorded from Eastbourne. Earlier, upon the 15th October, I took a single *Aporophyla nigra* Haw. (Black Rustic) for which the only other records for here are singletons listed in Salvage (1952) per D. Hillman and Adkin (1930). — MARK PARSONS, 43 Kings Avenue, Eastbourne, Sussex.
